

Biochemistry 2360 mid-term tutorial notes

Please read the following information very carefully. It can save you time and money. Everything has been explained in simple and plain language so there should not be any misunderstanding. All fees for the booklets and for the tutorial sessions are final and there are no returns or refunds for any reason. By paying the fee you are agreeing to all conditions set forward by www.prepseminars.com

I don't have access to U of M WebCT site (needs an ID and a password) so If you are taking a course that it has its materials and information on U of M WebCT site and you need help for that course please contact me by the phone or by the e-mail.

1-These notes will only cover the materials for the mid-term exam (from the start of the course up to the mid-term exam).

2-The final exam tutorial session has its own set of the notes which will cover only the materials for the final exam (materials from the mid-term exam up the end of the course)

3-This tutorial booklet is not a solution manual. This booklet is hand written, not typed.

4-The tutorial booklet covers an overview of the materials you need to know for this particular course. It covers important topics, theoretical concepts, definitions, formulas, graphs, tables, diagrams, shapes, names, explanations for the topics, etc.....

5-Biochemistry 2360 mid-term exam has some calculation questions and some theoretical questions.

6-I will go over all calculation questions during the mid-term tutorial session (list of the questions are on the web site) and the answers to the calculation questions are not included in the mid-term tutorial booklet.

7-I will go over some theoretical questions that they need to be explained

8-You need to know structures, names, graphs, tables, cycles and definitions the way they are in your text book or in your class notes for the mid-term exam. I can not change them or make them simpler, so I have included the general answers to any theoretical questions, structure questions, definition questions and graph questions in the mid-term tutorial booklet and I will not write down those answers again during the mid-term tutorial session.

9-To prevent unintended **plagiarism the answers for the non-calculation questions are given as the general answers. This means the answers to the non-calculation questions are included in the tutorial booklet but you can not just use these general answers for a specific question. (Next page)**

10-To answer a specific question you need to take out short parts or long parts of the general answer and then write the answer in your own words so we don't end up having 80-100 students with the exact word by word answer for the same question.

11-I have put the tutorial booklet together based on your course outline, your text book and your class notes. All materials in the tutorial booklet are available to you through different sources; I just put them all together in one place. You are still responsible for everything covered in your course outline and the class notes.

12-I will not offer any tutoring help by the phone or by the e-mail so make sure you ask all of your questions during the tutorial sessions.

13-If you have a question that you want an answer to it, you can send it to me (before the tutorial session) in a PDF file or MS words format by the e-mail and I will go over it during the tutorial session. I will only answer the questions during the tutorial session so everybody can benefit from it.

14-The tutorial booklet is ready only on the day of the tutorial session or afterward.

15-If you lose your tutorial booklet for any reason you need to pay the full \$40 for another copy.

16-If there is anything wrong with your tutorial booklet (such as missing pages or copying problems) let the person in charge know about it. If you leave the tutorial session or the point of purchase with the tutorial booklet, I assume that you accepted the tutorial booklet complete and to your satisfaction. All sales are final and there are no returns and no refunds.

17-There might be some unintended mistakes in the tutorial booklets so if you find any mistake in the tutorial booklet or if you notice any mistake made during the tutorial session please bring it up to David's attention in person, by the e-mail or by the phone so the mistake can be corrected.

18-If you want to be notify about the dates and locations of upcoming tutorial sessions you can add your e-mail to the e-mail list by going to www.prepseminars.com

19-All rights are reserved. No copying or no reproduction of these notes in any way. For more detailed information about the notes please visit the web site www.prepseminars.com
