

# Biochemistry 2370 mid-term tutorial booklet

Please read the following information very carefully. It can save you time and money. Everything has been explained in simple and plain language so there should not be any misunderstanding. All fees for the booklets and for the tutorial sessions are final and there are no returns or refunds for any reason. By paying the fee you are agreeing to all conditions set forward by [www.prepseminars.com](http://www.prepseminars.com)

I don't have access to U of M WebCT site (needs an ID and a password) so If you are taking a course that it has its materials and information on U of M WebCT site and you need help for that course please contact me by the phone or by the e-mail.

1-This booklet has only answers to old mid-term exams starting from Feb. 2000 to the last year mid-term exam. There are no notes in this booklet because you need to know structures, names, graphs, tables, cycles and definitions the way they are in your text book or in your class notes for the mid-term exam. I can not change them or make them simpler.

2-The final exam tutorial booklet has notes for some materials that need explanations such as lab section and calculations.

3-This booklet is hand written, not typed.

4-To prevent unintended **plagiarism** the answers for the questions are given as the general answers.

5-To answer a specific question you need to take out short parts or long parts of the general answer and then write the answer in your own words so we don't end up having 80-100 students with the exact word by word answer for the same question.

6-The answers in this booklet are based on the course outline, the text book and the class notes. All materials in this booklet are available to you through different sources; I just put them all together in one place. You are still responsible for everything covered in your course outline and the class notes.

7-The answers in this booklet are based on the course outline of the year the exam has been taken. For example, the 2001 and the 2002 exams are based on the class notes and the text book that have been used for those years not the years before or the years after.

8-The text book and the class notes have been changed over time. Your reference to answer any question in any exam must be this year's text book and this year's class notes.

9-Always look at this year class notes before you try to answer a question. Some questions and some answers must be adjusted to cover all the new materials. For example the values for the **ATP** per **NADH**, **NADPH** and **FADH** must be changed in older exams. (Next page)

**10-I will not offer any tutoring help by the phone or by the e-mail.**

**11-If you lose your booklet for any reason you need to pay the full \$40 for another copy.**

**12-If there is anything wrong with your booklet (such as missing pages or copying problems) let the person in charge know about it. If you leave the point of purchase with this booklet, I assume that you accepted the booklet complete and to your satisfaction. All sales are final and there are no returns and no refunds.**

**13-There might be some unintended mistakes in the tutorial booklets so if you find any mistake in the tutorial booklet or if you notice any mistake made during the tutorial session please bring it up to David's attention in person, by the e-mail or by the phone so the mistake can be corrected.**

**14-If you want to be notified about the dates and locations of upcoming tutorial sessions you can add your e-mail to the e-mail list by going to [www.prepseminars.com](http://www.prepseminars.com)**

**15-All rights are reserved. No copying or no reproduction of these notes in any way. For more detailed information about the notes please visit the web site [www.prepseminars.com](http://www.prepseminars.com)**
